Flying Colours Selects True North Avionics For Challenger 850 Aircraft

Peterborough, Ontario, Canada, October 1, 2010 – Flying Colours Corp., a global aviation service company, has selected True North Avionics for its airborne telecommunication system and broadband high speed data solution on its next three green Bombardier Challenger 850 aircraft.

Flying Colours will supply and install True North's innovative Simphonē OpenCabin telecommunications system, featuring Wi-Fi, high-speed data integration, corded and cordless handsets, and worldwide Iridium® Satcom, along with TrueNorth's Simphonē Global Broadband System on each of the three aircraft.

“We take great pride in evaluating the most modern telecommunications and broadband options to present to our clients. We are very confident in True North's products, as they are cutting edge, user friendly and reliable,” stated Sean Gillespie, Director Completion Sales & Management at Flying Colours.

“We're pleased to be able to work with an industry leader like Flying Colours, and we're gratified that, with our airborne telecom and broadband systems, Flying Colours' customers can now manage all their business communications from their aircraft, no matter where they are in the world,” noted Mark van Berkel, TrueNorth's president.

The three Bombardier Challenger aircraft are owned by different entities and will be based internationally. The aircraft are currently in progress at Flying Colours's head office in Canada and USA office in St.Louis, MO.
